

Energy Policy

Electrosteel is committed to –

- Promote energy conservation measures by implementing suitable operational practices & involvement of employees at all levels.
- Comply with applicable legal and other requirements related to energy use, consumption and efficiency.
- Strive for continual improvement in energy performance through adoption of energy efficient technology and services.
- Setting & reviewing of energy objectives & targets, ensure availability of information and necessary resources for achieving the same.
- Communicate energy policy at all levels within the organization and review the policy periodically for continuing suitability.
