MONTHLY HIGHLIGHTS

HAPPENINGS

Phatake Mukta Diwali (Cracker Free Diwali)

Employees across the Electrosteel Group took the Phatke Mukta Diwali pledge. Fire crackers are harmful for health and cause great discomfort to recovering Covid19 patients. Which is why we decided to take this pledge to play a part in reducing pollution and helping the people recovering from the Covid19 virus attack.

Pfizer has chosen Electrosteel France DI pipes in the race to develop the first vaccine against Covid19.

The production site, located in Puurs, Antwerp, Belgium, is one of the sites where the mRNA vaccine candidate against SARS-CoV-2 was discovered with its partner BioNTech.

Pfizer chose the high-end ELECTRO-LOCK® piping system for the water supply and the FM certified fire-fighting network.

We are proud contribute to the fight against the Coronavirus in Europe and around the world.

CSR AND US

- We helped repair the ground at Suryasen Nagar Sporting Club, Khardah, which we use for our Cricket tournament.
- Our BW donated face masks and hand sanitisers to the Police Outpost in Bansberia.

PFIZER, Puurs, Antwerp

WE, THE PEOPLE

The family members of the Electrosteel Group also took a pledge to observe a Phatke Mukta Diwali.
