Part-G

Impact of the pollution abatement measures taken on conservation of natural resources and on the cost of production:-

- 1) By installing a temperature sensor in the cooling water pump and reducing unnecessary pump operation through temperature monitoring, we have successfully saved 12,415 kWh of energy this year.

Part-H

Additional measures /investment proposals for environmental protection including abatement of pollution, prevention of pollution: -

- 1) We plan to concrete a 50-meter stretch of road from the raw material ground hopper of the Ferro Alloy Plant.

The plant is consistently striving to improve the working atmosphere through innovative approaches, with a focus on maintaining sustainable development in the surrounding areas.

Part-I

Any other particular for improving the quality of the environment:-

- a) Observation of “National Safety Day” & “World Environment Day” on 4th March & 5th June respectively to create awareness among the staff, local community & also planted 320 saplings in new land area during this financial year (2024-25) to abate pollution.
- b) In this financial year (2024-25), 10.02 MT of plastic waste generated from our processes has been disposed of through M/s KGN Enterprise (Haldia).
- c) Organize regular in-house training and counseling programme on “Housekeeping, Safety, and Environment” to enhance awareness among all employees.
